

Metal Fume Hood

Topair's Metal Fume Hoods protect laboratory staff from noxious fumes when working with acids, dangerous gas, organic solvents, etc. Harmful and unpleasant chemical fumes are removed from the controlled environment to facilitate a safe and pleasant work environment.

The fume hood channels chemical vapors out of the building using an external fan installed on the roof or on an external wall.

The hood structure is made of epoxy-covered metal, while the internal structure is made of HPL 6mm.

The hoods are **EN-14175 / CE / ASHRAE 110-1995 certified**.
